

Reconstruct $x(t)$ from PD Volterra Eq.
with $c_0 = 0, c_1 = 0$ (noise = 0.01%)

$$\frac{\|\hat{x}_{\text{spec}}(t) - x(t)\|_{L^2}}{\|x(t)\|_{L^2}} = 3.001\text{e-}03$$

$$\frac{\|\hat{x}_{\text{data}}(t) - x(t)\|_{L^2}}{\|x(t)\|_{L^2}} = 4.093\text{e-}01$$
